

# Math Instruction Card

Topic:

**EXAMPLE PROBLEM:**

Term	Definition

**What I need to know before I start:**

**How to set up the problem:**

**How to solve the problem:**

**Step 1:**

**Step 2:**

**Step 3:**

**Step 4:**

**Step 5:**

**How to check if the answer is correct:**

**When I would use this in real life:**

Instructions:

1. introduce blank Math Instruction Card
2. explain that students will create one for each new topic they encounter in math
3. practice – help student complete one for something simple that they already know
4. use for each new topic in math; create practice problems on the back
5. review often
6. keep in a binder for the student – a math reference book
7. to monitor and evaluate, check for understanding often and use prior sheets to help with new ones – transfer information necessary
